1. Examine the site.
2. Tear off and replace the roof by sections. Complete the job on time with no delays.
3. Stay in the house as usual during the renovation.
4. Use tile rail technology to prevent any breakage during transportation.
Q & A | Frequently Asked Questions

Q: Is Re-Roof possible? And what kinds of the new roof are available?

A: Yes, it is possible by considering the weight of the old roof and the degree of the roof structure compared with the new roof specs to see whether the weight is similar or not. If it weighs similarly or less and the degree of the roof structure is not less than the new one's, then it's possible.

Q: How can we be sure of no budget overrun?

A: Our skillful staff will examine the actual work site to assess the problems and work procedures. Summary report of the roof inspection and cost calculation will be provided for the homeowner to decide if they will receive the services.

Q: During roof renovation, don't we need to move out?

A: SCG has plans to renovate the roof by section allowing the work to be completed each day. The professional technicians will prepare the equipment to prevent damages during installation. Therefore, homeowners can stay in the house as usual.

Q: I already have a technician, can we only purchase the products?

A: Yes, you can only purchase the SCG products. However, we recommend the installation to be done by the highly-experienced experts from SCG with 1-year warranty for Re-roof and 6-month warranty for Roof Repair.
